

THE CHANGING WORLD OF SEVENTH- CENTURY EGYPT

**CONFERENCE
10–11 SEPTEMBER
2024**

**Humboldt-Universität zu Berlin
Theologische Fakultät, Room 108
Burgstraße 26, 10099 Berlin**

The seventh century of our era brought dramatic changes to the Near East and North Africa. For deeper insight, we turn to Egypt's papyri and ostraca - letters, contracts, lists and accounts, receipts and chits - that provide unique glimpses into the administrative, social, and economic history of the time.

This conference is the final event of the collaborative research project *Documentary Snapshots from Seventh-Century Egypt: Local Responses to Regime Transitions* at University College London and Humboldt-Universität zu Berlin.
